Classroom activities will focus on technical terms, starting with fundamental terms such as sentenceutterance, proposition and definitely including terms conventionally associated with linguistic forms, such as interrogative and terms conventionally reserved for 'forces' or interpretations, such as question. Processing subject and object relative clauses: evidence from eye movements.

Iscomprehensionnecessaryforerrordetection?Malden,MA:BlackwellPubl
Speech errors tend to occur in the lexicalmorphemeand phoneme encoding steps of language production, as seen by the ways errors can manifest. Although it may be tempting to segment speech using the acoustic signal only, it is nevertheless impossible to completely exclude information about linguistic

structure, such as syllable, word or phrase boundaries.
